

*Thank you for your loyalty to our Puro-Kleen™ product line. We continually strive to provide the finest in filtration media you can find to protect your investment. Please read below as we have provided suggestions to ensure your experience with our product is the best it can be. ~ The Puro-Kleen™ family*

## *Suggested Usage and Care:*

### **Media Preparation:**

- *Material may be cut to size with a sharp pair of scissors. (Use caution when handling sharp objects, scissors should be pointed down when not seated and absolutely no running).*

### **Media Installation:**

- *Installing media incorrectly will affect filtration performance and decrease lifespan of media.*
- *New media should be installed when water flow decreases significantly, or when fraying, wear or damage from excessive cleaning is detected.*

**Kleen-Guard.** *Water should flow from white side of media through to the blue side of media.*

**Ultra-Guard.** *Media is printed with "DOWNSTREAM" where the water should exit.*

**Perma-Guard.** *This media is bidirectional, water may enter or exit either side.*

### **Media Cleaning:**

- *To remove debris yet retain beneficial bacteria, gently swish media in separated tank water.*
- *Media may be thoroughly cleaned by back flushing with tap water and a fish safe detergent.*
